### Certificate of Appreciation

Dubai Municipality | April 2016

### Gamification

University of Pennsylvania on Coursera | March 2015

## Tool Set & Expertise

# Mohammad Faizan Atiq

UX / UI Designer | Full Stack Designer

## Projects – Some of my interesting work

### ● Name: UTS Store, CMS

Role: UX & UI Designer, Front end Developer

Area: Design, Web, Mobile App

UTS Store is an e-commerce platform built entirely by the in-house development team. The project focuses on selling the company's products and services to their existing customers.

This project is an augmentation of the existing purchasing process. Each process has been carefully studied and researched to build a seamless experience for both the Company's users, and its customers.

The client required a seamless experience across all platforms, i.e. web and mobile phones.

The app design and every module are crafted to ensure seamless customer experience. e.g. the user can start the purchase on one platform and then move to another platform to complete the purchase. The project was designed and developed using the following tools and technologies like Adobe XD, Microsoft Visio, Adobe Photoshop, .net

### ● Name: Growerry Mobile App

Role: UX & UI Designer, Brand Consultant

Area: Design, Mobile App

The client required a solution that allowed its users to search for ingredients and later get healthy recipes. The scope of work included corporate branding, mobile app design, website design, social media content designs, and periodic video content publications.

### ● Name: Muslim Aid Australia Mobile App

Role: UX & UI Designer, Front end Developer

Area: IOS App, Android App

The scope of the project was to design and develop a mobile app (ios and android) that could allow its users to view organisations projects and then provide donations.

The answer was a mobile app built on the foundation of Google's material design. App follows the company's branding guidelines, iconography and graphic elements (colours & typography). The tools used are Adobe XD for wireframing & prototyping and Ionic framework for development.

### ● Name: Wasel Order App Culture & App Icon

Role: Designer

Area: Branding

Wasel Order app icon focuses on the core business values, i.e. faster community-based delivery. The colour & culture conceptualises and highlights the importance of premium service to deliver everyday goods.

### ● Name: Media Table Demo

Role: UX & UI Designer, Developer

Area: Unity 3d

It's an interactive educational demo developed on Unity3d that explains the company's principals via intuitive presentation for windows. The most exciting part how each principal like oil drilling, water purification, logistics and other area works, later converting them into an interactive digital interface. The Project is by far my most exciting project.
